

6505® MH

OVERVIEW

Featuring an all tube preamp and power amp, the 6505® MH authentically produces the much loved tones of the legendary Peavey 6505 in a small, portable package. The 6505® MH has two channels that follow the same gain structure and voicing of its big brother! The channels share EQ, lush reverb and an effects loop. Channels, crunch, effects loop and reverb are all footswitchable. T.S.I.™ tube monitoring constantly lets you know that your power tubes are in good shape, and if not, which ones need to be replaced. The back panel of the 6505 MH is full of modern technology, including Peavey's exclusive MSDI output, USB recording output, headphone output, speaker defeat switch, plus a built-in power attenuator!

FEATURES
