

DPE 118P

OVERVIEW

The DPE™118 powered subwoofer has an ultra-reliable power section with a total of 1,200 watts of peak dynamic power and DDT™ compression. The DPE 118P uses high-quality materials including Peavey's exclusive Pro Rider® speaker. The Peavey DPE™118P has a variety of applications such as extending the bass performance of smaller full-range speaker systems for sound reinforcement, public address, side fill system, karaoke or musical playback.
